

Radial delayed-focusing validation: tau and K_dyn refinement (reconstruction-free $R_{0.5}$)

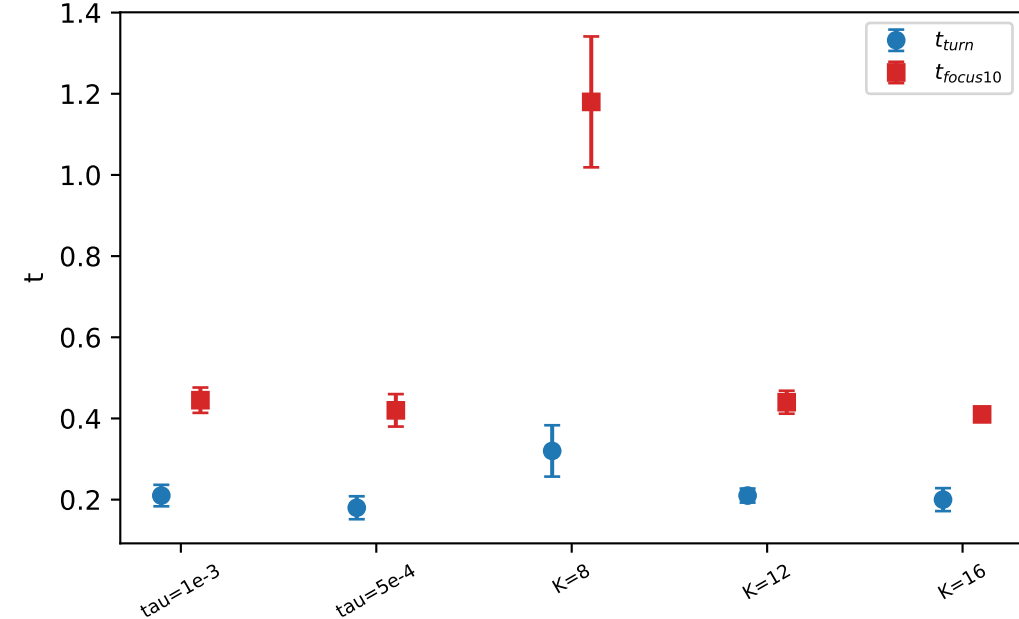

(a) $R_{0.5}(t)$: tau refinement (M=96, K=12)

(b) $R_{0.5}(t)$: K refinement (M=96, $\tau=1e-3$)

(c) t_{turn} , $t_{focus10}$ (mean $\pm$ seed std)

(d) $R_{0.5}(T)/R_{0.5}(0)$ (mean $\pm$ seed std)
